

ASSA ABLOY SUSTAINABILITY JOURNEY

Reduce, Improve, Enhance

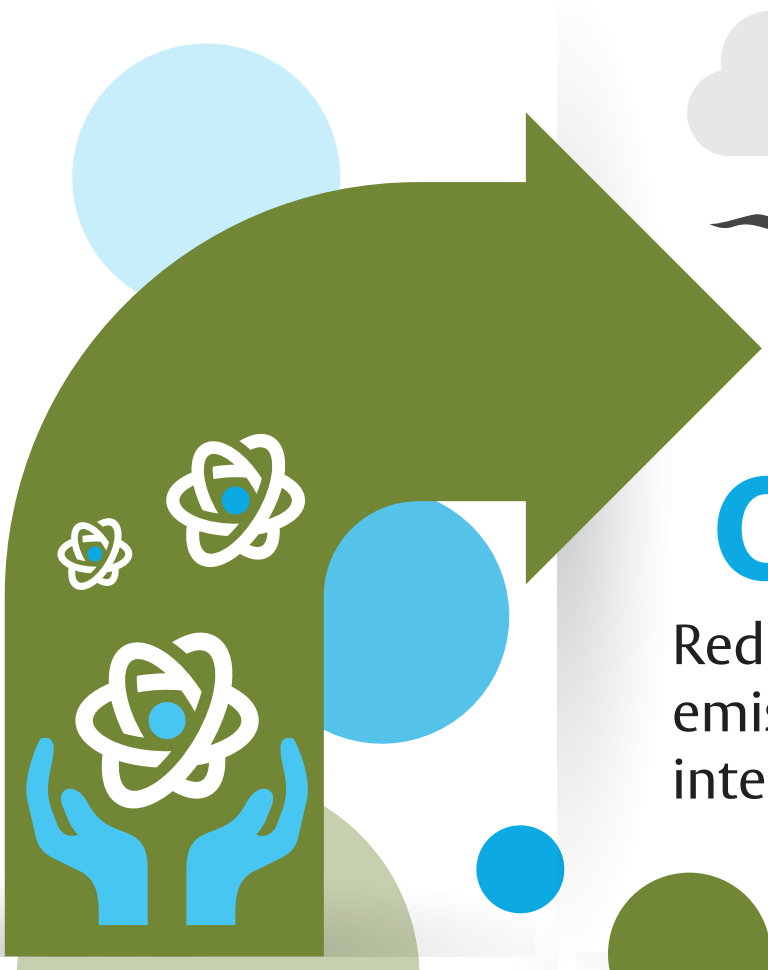

ASSA ABLOY ran a Group Sustainability Program until the end of 2015, aiming to substantially improve a host of material KPIs against 2010 figures typically by 15%. Most were exceeded, see the actual reductions below.

ASSA ABLOY has:

01

Reduced energy consumption intensity by

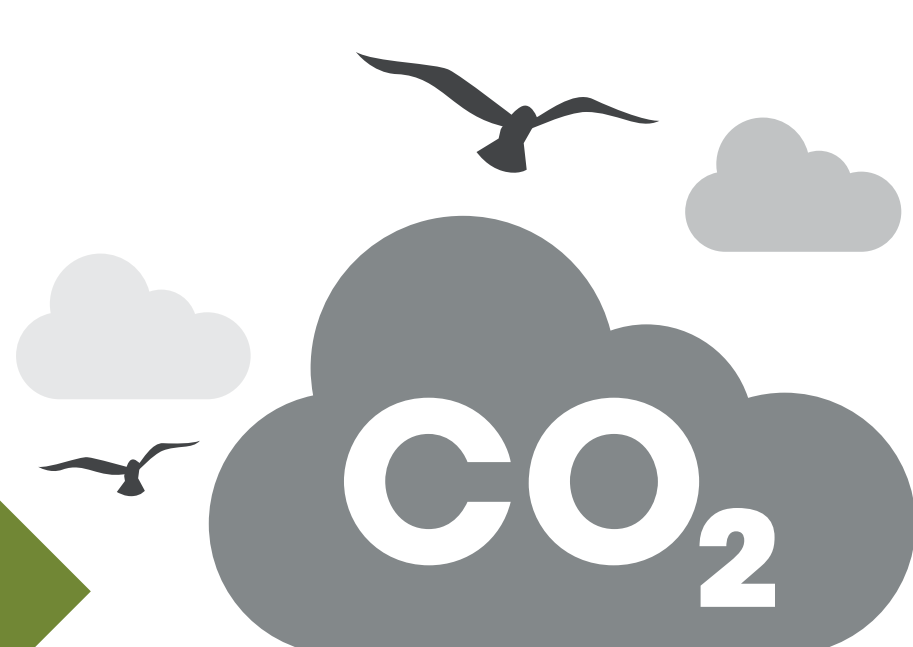

30%

02

Reduced carbon emissions intensity by

38%

03

Improved water efficiency by

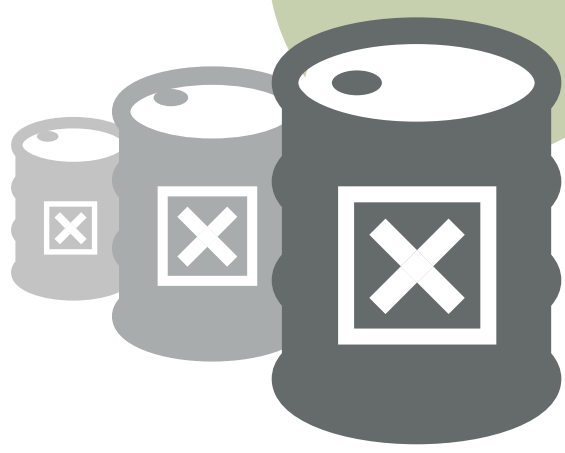

34%

04

Reduced hazardous waste intensity by

56%

05

Reduced chlorinated organic solvents by

99%

06

Improved health and safety performance by

17%

As the global leader in door opening solutions, ASSA ABLOY utilises sustainability as an innovation driver:

1 ASSA ABLOY's market position creates opportunities for intelligent solutions and products that contribute to energy and cost savings for customers.

3 ASSA ABLOY has developed an Environmental Product Declaration (EPD) program to increase product transparency, based on life cycle analysis.

2 Sustainability is embedded in every aspect of the ASSA ABLOY value chain, from innovation to sourcing, manufacturing, logistics, energy use during operation and recycling at end of life.

4 ASSA ABLOY's door opening solutions are aimed at making customers' buildings more energy efficient, while being produced with minimal resource consumption.
